

# Water Enhancement & Treatment Project for Ice Lakes

## WHY BE W.E.T.?

- Clear, Clean Water for our Children
- More like Lake Tahoe
- Recycled Water
- Recreational Opportunity

The **WET** Project is about our future. The **WET** project uses construction tools such as logging, clear-cutting, construction, and dredging, to help guarantee our communities' green future.

The **WET** program:

- Provides water for our children and senior citizens.
- Doubles the use of recycled water on the Summit.
- Helps create a clear, deep, blue Ice Lakes.
- Increases the recreational value of Ice Lakes!

This green mountain community will not only be a gateway to the outdoors and a source for wilderness education and recreation, but will also ensure safe, healthy, and reliable water supplies for generations to come.

A land trust will protect this open space in perpetuity. It's your Water AND your Future!

**Say "Yes" to the Future!**

## BE WET FOR OUR CHILDREN!

Construction is only for now, the buildings we leave are for the future. Our children are our future and in these times of uncertain weather and water we must do what we can to ensure that green communities like Serene Lakes and Royal Gorge are protected from the ravages of development, erosion, and global warming. The WET program guarantees a green future.

The WET Program - Water for Kids!

## RECYCLING WATER IS ALL WET!

Being Green and living Green is all about recycling. And if the Royal Gorge Conservation Community is built, water recycling on Donner Summit will more than double!

Imagine the recycling possibilities: Recycled water for snow-making, recycled water for irrigation, recycled water for you and your children!

The WET Program - The Circle of Life!

**ReCycling is Nature's Way!**

**MAKE  
ICE  
LAKES  
BLUE!**

The WET Program goes deep

## LAKE TAHOE IS WET!

The WET program will make Ice Lakes like Lake Tahoe. Lake Tahoe is famous for its deep lake views. The "Enhanced Depth Creation" built into the WET Program helps us to help you make Ice Lakes into "Lake Tahoe Jr."

The WET Program - Make our Lake Better!

## RELAX BY GETTING WET!

In Summer, when people come to Ice Lakes the WET Program ensures that beach space is maximized. In Winter, the program maximizes water volume so fish can breed.

The WET Program - Makes Sense for Nature!
